Start Date 6/30/2014
End Date 6/30/2014
Professional Development Hours 1 hour per attendee

Event Description

Describe the program, its target audience, objectives, location, dates, and registration information. Include contact information with a link.
edWeb is a free, web-based learning platform that provides a social network for educators, a repository of free and recorded educational products, and CE certificates for PD hours that are widely accepted nationwide. The edWeb community consists of over one million PD educators in all class: classroom teachers, paraprofessionals, student support personnel, media specialists, librarians, academic coaches, administrators, and pre-service teachers. We have programming that supports all.

Agenda

Times can be approximated as 45-60 hours per class. However information regarding contact is required.
All edWebinars are approximately 10 minutes in length. Upon completion, educators will receive a certificate of completion. Each presenter begins with a brief agenda for the presentation, highlighting the topics to be covered, and concludes the presentation with a live Q&A session. edWebinars include an optional objective quiz that can be taken by the participant to demonstrate their learning. Our results are printed on the personalized CE certificate. edWebinars use a mixture of direct instruction from qualified presenters, participant dialogue with the presenters, and online chats between educators at the conclusion of the edWebinar.

Target Audience

edWebinar target audience includes all K-12 educators, including classroom teachers, school and district leaders, instructional coaches, technology specialists, media specialists, paraprofessionals, student support personnel, and early childhood specialists.

Registration Information

Membership in the Education can join at www.edweb.net. Members may choose to participate in a live edWebinar, or watch pre-recorded, on-demand webinars.

Focus Areas

Choose the primary Focus Area (Section 8)(2) (links: https://www.edweb.net/Professional_Development_Filter_Page_8) and describe how your event relates to the selected Focus Area, and how educator participation in the program will increase student achievement.

Instructional Strategies
The goal of edWebinars and edWebinars and edWebinars communication align with the overarching goal of increasing student achievement, engagement, learning, and collaboration-readiness. edWebinars goal includes:
- Providing educators with the best professional, personalized learning and support they need to keep up with all of the changes in teaching and learning, new practices and pedagogy.
- Expanding their current knowledge and edWebinars technology into instruction.
- Offering professional learning when the content of the curriculum that support global learning applications, are continuous over time, and provide a respectful and healthy community for professional change and collaboration.
- Connecting a community of over one million educators with peers and experts for sustained, collaborative professional learning that can have an immediate impact on school culture, teaching, learning, and student engagement and achievement.
